

COUNTIES · CITIES · STATE AGENCIES · HIGHER EDUCATION

We replace spreadsheet-and-email status reporting with software your staff will actually use.

For departments that spend more time collecting updates than acting on them.

NAICS	IDENTIFIERS	BUSINESS SIZE	LOCATION

WHAT WE BUILD

Strategic plan and goal tracking

One dashboard showing which goals met target, which updates are missing and what needs follow-up. Filter by department, objective or plan area.

Online forms, approvals and reminders

Annual update forms, reviewer approval steps, automatic reminders, and a permanent record of who changed what and when.

Connect the systems you already own

Microsoft 365, SharePoint, Power BI, Excel and existing databases, so staff stop re-entering the same numbers.

AI drafts a person signs off

Progress summaries drafted automatically, then reviewed and approved by a named staff member before anything is published.

Accessibility and public records

Built to WCAG 2.1 AA. Records stay retrievable for Virginia public-records requests and council reporting.

WHY MG V

20 years inside a Fortune 500 bank

Adolph White Jr. spent more than 20 years at Capital One on contact-center systems, network changes and cross-team delivery. You work with him directly, not an account manager.

A Henrico County business

Based in Glen Allen. On site the same day, with no travel cost.

You see working software first

Click through a live prototype of your own workflow before you commit to a build.

Working prototype: strategic plan tracking

A clickable system where staff submit a goal update with supporting records, a reviewer approves or returns it, and the approved number flows into a printable progress report. Demonstrates separate staff and reviewer roles. A complete illustrated guide is available.

Built as a demonstration for a City of Chesapeake request for information. It is not a City deployment.

HOW WE GET STARTED

- 1 Talk with us.** A brief introductory conversation, at no charge.
- 2 Choose the work.** Agree on a useful first assignment.
- 3 Approve the quote.** Deliverables, price, and timing are agreed before paid work begins.

Additional work is agreed separately.

Example project pricing: \$8,500 for discovery and an approved prototype, about three weeks. Build phases from \$35,000. Purchase order, or subcontract through a prime.

SELECTED WORK

DNA Health Insights · live

Live consumer genomics app: upload a 23andMe or Ancestry file in the browser; only structured findings leave the device. 102 API endpoints, 4,900 tests, 20 CI gates. Built solo in five months. Family member's practice — a work sample, not an independent reference.
